# PEDRO TORCHIO

Hello there, I'm **Pedro Torchio**.

I've been working as a **web developer** for the past five years and would love to experience living and working in another country. In fact that's a wish I've had since a was really young and tit's always driven the choices I made in life.

I gradually discovered the web technologies and I'm particularly excited about the growing merges between **Web platforms and mobile applications**.

My goal is to create easily accessible web tools that will enhance the **users experience**.

Also, I love planning and refactoring.

Clean and elegant code, with great interface declaration, is coffee to me. Could work on it for days straight.

A short summary of my experience path from start to [there is no end] is Database, PHP, Wordpress, Basic Frontend, Javascript Framework, Progressive Web Apps..

NABUCO MAGAZINE
http://www.revistanabuco.com.br

* Government funded blog and magazine

* Self managed Wordpress content

* Fully customized Theme and Functionalities

* Progressively enhanced content (no scripting needed)

11/2017

Discover New Worlds

Self Managed Website   Blog   E-commerce   Web App   Web System

You change the content youself.
No skills required.

Ideal for small companies.
It's much cheaper to be able to update all the information in the website without having to reach for any service provider.

Directus Headless CMS

PWA

Java

VueJS

Wordpress

Restful API

TypeScript

SQL

CSS 3

JQuery

PHP

PHP

Have been using it heavily since my first internship in Web Development in 2014.

and more..
